PROFESSIONAL SUMMARY

I specialize in building exceptional digital experiences to simplify everyday life and solve common problems. I am a software developer with specialization in front end development and engineering.

EXPERIENCE

Software Engineer   Aug 2021 – Present
Teknorix Pvt Ltd   *Goa, IN*

- Implemented a cutting-edge Customer Relationship Management System (CRM) to proficiently manage a diverse client base of over ten thousand customers and companies. This streamlined communication, fostering stronger client relationships.
- Revamped the responsiveness and user experience of multiple News and Publication Management Systems, prioritizing accessibility and usability on various devices, including older models.
- Enhanced project efficiency by swiftly addressing bugs and conducting comprehensive testing, resulting in heightened client satisfaction by 100% and improved sprint planning.
- Revitalized a Knowledge-base system, modernizing its structure and design to elevate user engagement and overall experience by 80%.
- Introduced an in-app collaboration system to boost user productivity by 70%, enabling seamless communication and teamwork within the application.
- Led the maintenance and expansion of an in-house design system and component library, significantly increasing team productivity through enhanced code re-usability.
- Conducted thorough code reviews and actively participated in pair programming sessions, fostering knowledge-sharing and upholding coding standards within the team.
- Provided leadership and expert insights to resolve team challenges, earning recognition as the "Upcoming Leader of the Year" for consistently driving innovative solutions and collaborative problem-solving.

PROJECTS

Kuzina | *NextJS, Supabase, TypeScript, ShadCn*   GitHub Repo Link | Site Link

- A full-stack kitchen management web app to store kitchen stock, recipes and allow family collaboration for shopping.
- This helps my mom and me to keep track of recipes and ingredients.
- Used shandCn ui library and provided open source contribution to the library
- Implemented Google Auth and collaboration system to let users join existing kitchens.

Kognitive | *ReactJS, TypeScript, Supabase, ChakraUi*   GitHub Repo Link | Site Link

- A cognitive behavioral therapy journaling app, for challenging negative thoughts and emotions.
- I found most of these features under paywall in other apps, so I decided to build a free version.
- Made it open-source and as a free alternative to paid apps to facilitate accessibility and privacy.

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, Python, SQL (Postgres), Go.
Frameworks: ReactJS, NextJs, Node.js, Jest, Fastify, Express.
Libraries: Tailwind Css, Ant Design, Material UI, Supabase, LESS / SASS, ShadCn.
Developer Tools: Git, Webpack, Vite, Docker, Netlify, Vercel, VS Code, Visual Studio.

EDUCATION

Padre Conceicao College of Engineering   Verna, Goa, IN
Bachelor of Engineering in Computers   *Aug. 2017 – July 2021*
